

Addendum to Preliminary Alternatives Analysis Report for the Palmdale to Los Angeles Section of the California High-Speed Train Project

At the California High-Speed Rail Authority's monthly board meeting on July 8, 2010, the board members voted to approve the staff recommendation that the Palmdale to Los Angeles Preliminary Alternatives Analysis report be accepted, with the amendment that "the recommendation for continued evaluation of the Metrolink Station in Burbank as a possible high-speed train station location" be incorporated.

The Authority will study downtown Burbank as a potential high-speed train station location that would provide a direct connection with Metrolink service, and will incorporate the results of the evaluation into its Supplemental Alternatives Analysis report for Palmdale to Los Angeles.
